

Sub: Workshop on “Steel -for Sustainable Development”

4th Feb2023 at VMCC, IIT Bombay

Dear Sir/Madam,

Sustainable development is the foremost concern in the world today with climate change and its unpredictable effects causing havoc all over. Steel, as a major material of construction, can contribute to these goals of sustainability in a major way. The positive attributes of steel need adequate deliberation and propagation among designers, consultants and experts.

To create greater awareness regarding usage of steel the Institute for Steel Development & Growth (INSDAG), the Consulting Engineers Association of India – Western Regional Centre (CEAI-WRC) and the Indian Institute of Technology Bombay (IITB) have organised a one-day Workshop on *“Steel - for Sustainable Development”* on the **4th February 2023**.

The venue is the **Victor Menezes Convention Centre at IIT Bombay, Mumbai**.

The key objectives of this workshop are to discuss and deliberate on the latest methods of construction and technologies of the steel industry, and their advantages on achieving sustainable development goals. It will also focus on creating awareness amongst potential customers about the application and benefits of steel usage in construction and infrastructure.

You can participate in the workshop and offer your valuable inputs on this important topic. We also request you to nominate your colleagues to participate in this workshop.

The Brochure, Programme and Registration form are attached for your reference.

The registration can also be done using the Link for Registration online at

https://docs.google.com/forms/d/11_nYn8ax-zuMuADueslR2ppPGjPQNRv_ZzMPD8x70ts/edit

The link is also given in the Brochure as well as the Registration Form.

We look forward to your participation in the Workshop to take Engineering to greater sustainable heights.

With regards,

P K Mishra

Director General

INSDAG
