Greetings!

The Draft Indian Standard 'Criteria for Structural Safety of Tall Concrete Buildings' (First Revision of IS 16700-2016) has been published for wide circulation by Bureau of Indian Standards.

To understand and discuss the proposed revisions in the code, SEFI is pleased to announce a Webinar on this topic. **The Webinar, will be held on Saturday, August 6 2022 at 11 am IST.** The duration of the webinar shall be 1.5 hours.

The objective of the Webinar is to acquaint the user of the code with the underpinning rationale and studies that have informed the revisions. The webinar will also discuss the possible effects of the revisions on design of tall concrete buildings. The webinar will also address the doubts and queries regarding the revisions.

The speakers at the webinar are **Prof CVR Murty, Er. Alpa Sheth, Er. Anil Hira and Er. Ranjith Chandunni.** *All the speakers are members of the code drafting committee of IS 16700.*

The webinar is free. Registration, however, is mandatory. Interested persons may register at **www.sefindia.org/webinar**

Queries regarding the code or the proposed revisions may be posted on the Google form at this link:
